

Defense Supply Center Philadelphia (DSCP) Subsistence  
The Subsistence CFMS Newsletter  
October 2003

THE LATEST CFMS NEWS –

The Food Ordering Integrated Process Team (IPT) took place on August 21, 2003. The meeting included a meaningful dialogue on vendor products, with an extraordinarily fruitful interaction among all participants.

Meeting members agreed on a need to elaborate on wartime operations, and to discuss the entire operational process, with topics ranging from menu planning to accounting for leftovers. Therefore, we will be conducting a Wartime Operations IPT with the members of the Meal Planning and Food Ordering IPTs. The meeting will coincide with the DSCP Subsistence Customer Conference at the Atlantic City Convention Center, located in Atlantic City, New Jersey.

Concepts of Operations for Menu Planning and Food Ordering are nearly complete, and will be staffed to the IPT members for comments shortly.

AN ADDITIONAL NOTE!

We would like to meet with Service representatives in the very near future to gain a clearer understanding of how Defense Information Service Agency (DISA) Information Assurance requirements affect your operations. **\*\*DSCP is seeking representatives from each service with expertise in information assurance.\*\*** We want to be sure that we satisfy any additional or unique requirements you might have, such as the Navy and Marine Corps Intranet (NMCI), network connectivity requirements at the bases, and other security concerns related to hardware and software. Please contact Lynette O'Brien with the names of individuals who could represent your service on this IPT.

STAY TUNED FOR FUTURE CFMS INFORMATION!!!
